State of Maryland Requirements

(MDE)

From an email received from David Haffner of the MDE, the following are requirements needed to allow trees to be removed in a non-tidal wetland or wetland in Worcester County, Maryland.

The Applicant/Lot owner should provide the following information:

- A site plan showing recorded non-tidal wetland and the 25-foot non-tidal wetland buffer and the easement boundaries.
- The site plan must also show the location on an as-built survey of the home and any structures on the property.
- The site plan must show the location of the trees to be removed.
- Must provide reasons for removal of said trees.
- Identify if they are dead or dying.
- Documentation from an arborist for the reason to remove the trees.

Regards,

Ocean Pines, Chief Inspector

Joshua Vickers
